Multimedia PowerManual

Use the Power of Multimedia for More Effective Documentation

E.ON's Multimedia PowerManual will turn your printed user manual into an engaging, intuitive, interactive multimedia program. As a supplement to or replacement for your printed manual, PowerManual is a CD-ROM based interactive version of your manual. PowerManual includes graphics, audio, animation, video and text to deliver your product information in a high-impact multimedia format. PowerManual is fast to develop, flexible, and economical because it employs pre-built templates and a streamlined customization process.

You'll save money by getting fewer unnecessary support calls.

Your customers will use the Multimedia PowerManual more than they'll read your manual.

Powerful Features Make Learning Your Product As Easy As Watching TV

Logo Placement

For product and company branding.

Graphics

Display photos, illustrations and animations of key components and features.

Interactive Navigation

Quickly find desired information.

Link to Web Site

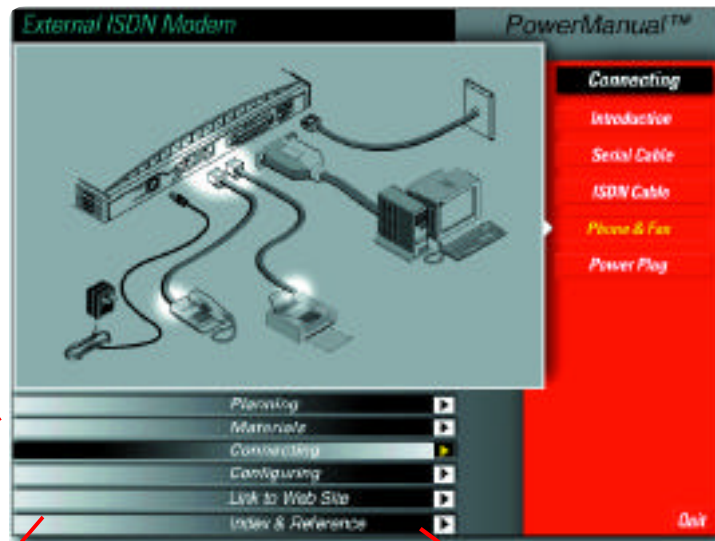

Users can connect directly to your Web site for the latest information.

Do Updates in a Snap

Because PowerManual is a modular system, updates are quick and easy.

Leverage Existing Material

Utilize existing materials including brochures, data sheets, and white papers.

CD-ROM Based

Put the PowerManual on its own CD or add to an existing software CD.

Audio/Voice Over

Users listen to clear descriptions of how to use your product.

Index & Reference Section

Jump to relevant information fast.

Options

Video

Include video clips of complex procedures.

2D and 3D Animation

Communicate hard-to-understand details with 2D and 3D animations.

High Impact Multimedia Introduction

We can create an impressive multimedia introduction for your product and extend your brand image.

Multiple Languages on One CD-ROM

Audio and text can change quickly for version updates in all languages.

On-Line Web Version

Let us develop an on-line version of the Multimedia PowerManual for your Web site, using industry standard Shockwave and RealVideo multimedia Web technologies.
